

These screens model the place_order use case.
The customer first logs in, then creates an order and finally displays its status.

		Screens		
Entity	Attribute	login	place_order	track_order
Customer	email	E/V		
	password_hash	M/V		
Order	status			D
	time_created		E	D
	customer_id		E	
	items		E/M	D
Menu Item	name		D	D
	description		D	D
	price		D	D

E - entered
M - modified
D - displayed
V - verified
